

# Transport and Access

## KERRS CREEK WIND FARM

Wind turbine components for the Kerrs Creek Wind Farm will be transported to site from the Port of Newcastle.

Over-size, over-mass (OSOM) cargo will take the Golden Highway and Saxa Road to Wellington, travel through Wellington and then take Burrendong Way to site.

Modifications to some intersections will be required to accommodate the larger components, especially the blades. This transport route avoids Molong and the Molong Swimming Pool.
